(54) Title: MULTIFUNCTIONAL URBAN COMPLEX

(57) Abstract: The complex, intended for application in big cities or city centers, where space for garages, storehouses and similar facilities is to be ensured, comprises a yard (1), situated between roadways (2) and railed off by a fence (3) with entrance door (4). In the yard (1) a school building (5) is situated and a sports-, play- and common activities zone (6) is shaped. In this zone (6), there is an at least two-storeyed underground construction (7), to which an approach (10) is shaped. In the approach area (10) there is a single-storeyed over-ground part (11). The construction (7) includes walls (12), bearing intermediate pillars (13) and floor panels (14) founding on the longitudinal footings of supporting beams (15). The pillars (13) have short consoles (16), where the beams (15) are mounted and they are restrained in monolithic footings (20), with their bottom ribbed ends (21) placed in preliminary prepared cups (22) encompassing this ribbed ends (21). The cups (22) have an internal ribbed surface (23) and partial outer ribbing (24).
